

The American Heart Association presents the Mission: Lifeline® STEMI Referring Center Silver Plus award to HSHS St. Clare Memorial Hospital for implementation of quality care for heart attack patients

HSHS St. Clare Memorial Hospital in Oconto Falls has received the American Heart Association's Mission: Lifeline® STEMI Referring Center Silver Plus recognition for its commitment to ensuring science-based treatment for all people experiencing a specific type of heart attack known as an ST elevation myocardial infarction (STEMI), known to be more severe and dangerous than other types of heart attacks.

Mission: Lifeline is a national, community-based initiative improving systems of care for patients with STEMI, non-ST elevation myocardial infarction (NSTEMI), stroke and out-of-hospital cardiac arrest. The program focuses on streamlining processes to speed the delivery of proper treatment for time sensitive, neuro-cardiovascular disease states.

Recognition as a Mission: Lifeline Referring Center is designed to showcase hospitals of every size on the front lines of care that do not have 24/7 cardiac catheterization lab availability but work in collaboration with emergency medical services to ensure patients receive guideline-directed STEMI and NSTEMI care.

HSHS Hospitals recognized for efforts in organ and tissue donation

HSHS St. Vincent Hospital and HSHS St. Mary's Hospital Medical Center in Green Bay, HSHS St. Nicholas Hospital in Sheboygan and HSHS Sacred Heart Hospital in Eau Claire have received awards for successful efforts to provide families with tissue donation information and options.

The American Tissue Services Foundation (ATSF) presents these awards to hospitals that achieve a tissue donation rate higher than the national average, which is 35 to 40 percent.

"Care coordination is particularly important when someone experiences a STEMI heart attack, and American Heart Association guidelines call for specific science-based treatment," said James G. Jollis, M.D., volunteer for the American Heart Association's Get With The Guidelines® - Coronary Artery Disease Systems of Care Advisory Work Group and cardiologist with The Christ Hospital Physicians – Heart & Vascular in Cincinnati. "Hospitals/Organizations like HSHS St. Clare Memorial Hospital are recognized for consistently supporting patients to ensure the best opportunity for recovery."

The Mission: Lifeline Referring Center award is earned by hospitals that demonstrate a commitment to getting patients the most up-to-date research-based care for STEMI as outlined by the American Heart Association.

"HSHS St. Clare Memorial Hospital is dedicated to improving the quality of heart care, and the American Heart Association's Mission: Lifeline program helps us achieve that goal," said Chris Brabant, President and CEO of HSHS St. Clare Memorial Hospital. "The Mission: Lifeline program puts proven knowledge and guidelines to work on a daily basis, so patients have the best possible chance of survival."

HSHS Sacred Heart Hospital recognized for excellence in stroke care

HSHS Sacred Heart Hospital, Eau Claire, is proud to have received two certificates for excellence in stroke care from the Wisconsin Department of Health Services' Coverdell Stroke Program.

HSHS Sacred Heart Hospital was selected to receive the 2022 awards over 81 other eligible Wisconsin Coverdell Champion Hospitals in the state.

In 2001, Congress charged the Centers for Disease Control and Prevention with implementing state-based registries that measure, track and improve the delivery and quality of stroke care. A national registry was established and named the Paul Coverdell National Acute Stroke Registry (PCNSR), after the late U.S. Senator who suffered a fatal stroke in 2000 while serving in Congress. The Wisconsin Coverdell Stroke Program is one of several state-based registries across the U.S. established as a result of the PCNSR.

The first Coverdell award presented to HSHS Sacred Heart Hospital recognizes the hospital's successful reduction in time between patient arrival and getting a crucial CAT scan (CT) when a patient is experiencing stroke symptoms. The CT procedure allows the stroke team to see detailed pictures of areas inside the body, in this case, the brain, where an active stroke may be occurring.

The second Coverdell award acknowledges HSHS Sacred Heart Hospital's expert stroke data tracking and reporting each quarter of 2022. This accuracy allows our hospital to continually streamline and improve upon efficiencies.

Newsweek names HSHS Sacred Heart and St. Joseph's Hospitals among the "World's Best Hospitals" 2023

HSHS Sacred Heart Hospital in Eau Claire and HSHS St. Joseph's Hospital in Chippewa Falls have been named among the 'World's Best Hospitals' in 2023 by Newsweek magazine and are among 20 hospitals in Wisconsin to make the list.

The designation is based on a survey of doctors, health care professionals and administrators conducted by Statista, a leading global provider of market and consumer data. It looks at quality of service, patient experience, patient outcomes and quality metrics such as wait times and hygiene measures.

The World's Best Hospitals 2023 recognizes the best medical institutions across 28 countries. The ranking is live on Newsweek.com and is featured in the print edition of Newsweek Magazine.

Introducing Justin Aman, Healthcare Relations Liaison

We are proud to introduce Justin Aman, Healthcare Relations Liaison for Prevea and HSHS Wisconsin Hospitals. As the healthcare relations liaison, Justin works closely with the AccessOne team and the ever-expanding network of hospitals that we coordinate care with. Justin has ten years of healthcare experience and understands the importance of relationships. "A healthcare organization is most successful with a strongly connected network of healthcare providers working together toward the common goal of delivering the absolute best patient experience and care possible," says Justin. He is eager to meet new people and create new relationships as he grows into his role with the AccessOne team.

NEW PHYSICIANS

Prevea welcomes new resident physicians in Eastern and Western Wisconsin

The MCW-Prevea Family Medicine Residency Program in Green Bay and the Prevea Family Medicine Program in Eau Claire are pleased to welcome ten new physicians to their programs. The residency programs are for physicians who have completed medical school and are interested in the field of family medicine. Each year, the programs accept newly graduated physicians for three years of training. They provide direct medical care to patients under the supervision of experienced faculty physicians and community preceptors.
