

ADVANCED REHABILITATION CENTER (ARC)

- 20 beds
- 10 - 14 day ALOS
- Rehabilitation focused
- Multidisciplinary team approach to all areas of patient care
- Activity Facilitator for rehabilitative therapy serving patients who may need rehab r/t:
 - Brain injury
 - Stroke
 - Multiple trauma
 - Amputation
 - Orthopedic surgery

Why did you choose ARC?

"It's an unexplainable feeling to be part of a patient's rehabilitation and see them improve!"

— Hazel

"It's a unique opportunity to care for patients for more than a couple of days and see them get stronger and more independent each day."

— Melissa

"I love the variety and working with the elderly. I have learned so much from them. Each day is a new and wonderful challenge."

— Cyndy

Visitor comments:

"Excellent service and care in all areas! If you could see me now, you would be 100 percent happy and proud being a nurse!"

"Excellent care. Goals exceeded! Thank you."

"I've been in and out of ARC since 2008! Each and every time the nurses treat me like family and take excellent care of me. I've been able to go home each time, due to the great care by the nurses and therapists."
