

Have you scheduled your COVID-19 vaccine?

Here are some frequently asked questions.

If a colleague is on FMLA/STD/LOA can they come in and get the vaccine?

YES

Is the vaccine safe if I am trying to conceive?

YES

If a colleague had COVID-19 in the last 90 days should they get the vaccine?

YES

Is it safe if I am pregnant?

YES

More information can be found at www.hshs.org/ColleagueVaccineInfo

Is it safe if I am breastfeeding?

YES

How does the vaccine risks outweigh COVID-19?

You've seen or have heard about the very worst effects of COVID-19 at our hospitals - as we have had many patients suffer greatly and even pass away. At HSHS we have given thousands of shots already and have had no reports of any unexpected side effects.

Are there advantages to getting the vaccine?

The main advantage is that the more people that get vaccines in the community as quickly as possible, the quicker we get back to normal and can SAVE lives.

Will there be opportunities to get the vaccine in the weeks to come?

Yes, as of now but not forever. This is a limited time, while supplies last offer. We cannot guarantee additional shipments will be available so sign up now! Speak with your leader to learn how.

Now, more than ever, **protect yourself, your patients and your loved ones.**
