## COVID-19 Lab Results in Chart Review

*Audience: Nursing, Providers (Ambulatory, Inpatient, and Emergency)*

COVID-19 Lab tests can display in **Chart Review** (Lab tab) for tests performed within our health care system as well as outside of our healthcare system.

### Let's Take a Look

When a non-HSHS healthcare system provides a copy of a **COVID-19** lab result, the **HIM** team scans the result into the patient's chart. It displays in **Chart Review** (Lab tab) as **OUTSIDE LAB COVID-19 (SCAN)**.

The screenshot shows the 'Chart Review' interface with the 'Lab' tab selected. The table below shows a single entry:

Col Date	Test	Status	Provider
Yesterday	OUTSIDE LAB COVID-19 (SCAN)	Final result	Documents Scanned

COVID-19 lab orders placed and resulted in our health care system will display in the **Lab** tab of **Chart Review**. We have a variety of orders, but they all have **CORONAVIRUS** in the name.

- CORONAVIRUS (COVID 19) [LAB525]
- CORONAVIRUS (COVID 19) QUEST [LAB535]
- CORONAVIRUS (COVID 19) RNA QUEST [LAB545]
- CORONAVIRUS (COVID 19) RNA MAYO [LAB539]
- CORONAVIRUS (COVID 19) PCR [LAB549]
- CORONAVIRUS (COVID-19) EXACT SCIENCE [LAB526]

The screenshot shows the 'Chart Review' interface with the 'Lab' tab selected. The table below shows a single entry:

Col Date	Test	Status	Prc	Enc Dept
04/20/2020	CORONAVIRUS (COVID 19) QUEST	Final result	J...	AW LAB PATIENT
