

Explanation of Tests/Education for Volunteers

We want you to be safe and healthy while volunteering at St. Nicholas Hospital, and we also need to protect our patients and staff. You are required to have these tests before your starting date to comply with licensure and accreditation standards. These tests, of course, are provided at no charge to you. Your cooperation is appreciated.

TB Testing

We will complete required TB testing prior to volunteering. The Employee Health Nurse will assess any additional testing that may be necessary.

Education Day

All volunteers are required to attend a once-a-year Education Day to comply with licensure and accreditation standards.

Confidentiality

Volunteers are required to sign a statement that they will maintain confidentiality.

Criminal Background Checks

Criminal background checks are done periodically on all volunteers.

Seminar/Meetings

Periodically, the Hospital sponsors educational opportunities that volunteers are invited to attend.
